

Gate 3 Readiness: What Was Proved vs. What Remains

Project I Delivers

Proven sort accuracy (≤ 100 ms latency)

Validated power budget (50.5 days)

SF ≥ 2 for bracket (SF=5.29)

AI inference working end-to-end

Costed BOM (\$124.85)

Version-controlled DHF

Project II Must Resolve

Production-grade firmware (OTA update)

Regulatory certification (FCC/ISED)

Injection-moulded housing

Supply-chain qualification

Cost reduction below $N_{be} = 12$

Customer pilot program
